PROFESSIONAL SUMMARY

Service Desk Engineer with 3+ years of experience delivering Level 1/2 support across multi-client managed environments. At ThIRU, I manage ticket-style incidents to SLA, deliver First Contact Resolution through structured troubleshooting, and support a broad Microsoft and infrastructure stack: Windows Server, Active Directory, Azure (SC-200 in progress), and hands-on virtualisation across VMware ESXi and Proxmox VE. I bring genuine cross-platform device support - Apple/macOS hardware and software troubleshooting alongside Windows - and hands-on security-tooling experience (DLP, SIEM, EDR) that most service desk candidates don't carry. Strong Cisco routing/switching, SonicWall and Fortinet firewall administration, and VPN configuration (SSL/TLS, IPSec). Master of Information Technology from Monash University.

CORE COMPETENCIES

Level 1/2 MSP Service Desk Support

First Contact Resolution

Virtualisation (VMware ESXi, Proxmox)

Apple & Cross-Platform Device Support

Active Directory Administration

Firewall & VPN Configuration

Security-Conscious Support (DLP, SIEM, EDR)

SLA-Driven Ticket Management

Windows Server & Azure

Networking & Connectivity Troubleshooting

PROFESSIONAL EXPERIENCE

Threat Incident and Response Unit (ThIRU)

June 2025 - Present

Service Desk Engineer

- Ticket Resolution & First Contact Resolution:** Managed the incoming flow of support tickets across multiple client environments; resolved 85% of critical incidents through structured, SLA-conscious troubleshooting and documented root-cause analysis.
- Virtualisation & Infrastructure:** Hands-on VMware ESXi troubleshooting (VM IP collision resolution, Xorg/Wayland display configuration, vSphere architecture) and Proxmox VE bare-metal deployment; Windows Server and Active Directory (GPO, Security Groups) administration.
- Cross-Platform Device Support:** MacBook, iPad and iPhone hardware/software troubleshooting alongside Windows endpoint support - genuine cross-platform coverage beyond a single OS family.
- Firewalls, VPN & Networking:** SonicWall and Fortinet firewall configuration and policy enforcement; SSL/TLS and IPSec VPN administration across multi-site environments; Cisco routing/switching for connectivity troubleshooting.
- Security-Conscious Support:** DLP policy deployment and troubleshooting, SIEM monitoring (ELK Stack) and Elastic Agent/EDR rollout across 40+ endpoints for a healthcare client - genuine experience in a security-conscious support environment.
- Continuous Improvement & Documentation:** Filed a structured root-cause report and resolution trail for every incident, converting recurring fixes into reusable runbooks.

Monash University

Feb 2023 - Jun 2025

IT & Infrastructure Project Work

- Cloud infrastructure audit (13 structured test cases, formal stakeholder report); network infrastructure deployment (segmentation, VPNs, IDS/IPS); IT security project work and documentation.

Internshala / Verzeo & MVARO

Aug 2022 - Jan 2023

IT Support Intern / IT Analyst

- Diagnosed and resolved technical issues across live business systems; produced professional client-facing reports.

EDUCATION

Master of Information Technology

Monash University, Melbourne

Feb 2023 - Jun 2025

Bachelor of Computer Applications

Jain University

CERTIFICATIONS & TRAINING

- Cisco CCNA (In Progress)
- Microsoft SC-200: Security Operations Analyst (In Progress - M365, Intune, Entra ID, Defender for Endpoint)
- HackTheBox SOC Analyst Learning Path (In Progress)
- LinkedIn Learning - Azure for Architects (Networking Strategy)
- Ethical Hacking & Cybersecurity Fundamentals

PORTFOLIO HIGHLIGHTS

Virtualisation Troubleshooting (VMware ESXi / Proxmox)

Hands-on hypervisor-level troubleshooting - VM IP collision resolution, display configuration, bare-metal Proxmox deployment.

sourav-ramakrishna.com

Cross-Platform Endpoint Rollout - Healthcare Client

Elastic Agent/EDR deployment across 40+ endpoints during a strict after-hours maintenance window, zero business disruption.

sourav-ramakrishna.com

Network Incident Resolution (Layer 2-7)

Resolved 85% of critical network incidents - VPN routing failures, ARP loops - via systematic Wireshark/tcpdump analysis.

TECHNICAL SKILLS

Windows & Cloud: Windows 10/11, Windows Server, Active Directory & GPO; Entra ID and M365 security surfaces (SC-200 in progress); Azure (SC-200 in progress)

Virtualisation: VMware ESXi (hands-on troubleshooting, vSphere architecture); Proxmox VE (bare-metal, multi-master); VirtualBox

Apple / macOS: MacBook, iPad, iPhone hardware and software troubleshooting; device setup and configuration

Networking & Firewalls: TCP/IP, DNS, DHCP, VLANs, VPNs (SSL/TLS, IPsec); Cisco routing & switching (CCNA in progress); SonicWall and Fortinet firewalls (hands-on)

Security Tooling: DLP policy deployment; SIEM monitoring (ELK Stack); EDR/Elastic Agent; incident triage and threat analysis

Linux: Parrot OS (bare-metal daily driver, 5+ years); Kali; Ubuntu; Rocky Linux

ADDITIONAL INFORMATION

Current National Police Clearance -- Clear | Driver's Licence: Full, unrestricted (Victorian) | Available for hybrid work, occasional on-site support
